

## LEED\* Data Sheet

\*LEED stands for Leadership in Energy and Environmental Design (LEED). LEED is a registered trademark of the US Green Building Council. ([www.leedbuilding.org](http://www.leedbuilding.org))

### SECTION 1: Product and Company Identification

**Product Name:** Wood Window Blind (Painted and Stained Only)  
**Product Use:** Interior Window Treatments  
**Manufactured by:** Springs Window Fashions, LLC  
7549 Graber Road  
Middleton, WI 53562  
(877)792-0002

### SECTION 2: Recycled Material Content (Percentages are by Weight)

(\*LEED – New Construction v2.2 Recycled Content Credit MR 4.1 and MR 4.2)

**Pre-Consumer Recycled Content:** 9.9%  
**Post-Consumer Recycled Content:** 30.8%  
**Renewable Content:** 57.5%  
**Total Green Content:** 98.2%

- Basswood used to manufacture this product is not FSC certified.
- The USGBC considers a regeneration rate of 10 years or less to be a rapidly renewable resource. North American Basswood (Linden) trees are fast growing, and can live up to 120 years. The maturity of the tree at harvest is dependent upon the overall age of the stand being forested.
- The product is formaldehyde free. Formaldehyde is not used in the processing or finishing of the wood used for this product.

### SECTION 3: Local/Regional Materials

(\*LEED – New Construction v2.2 Local/Regional Materials Credits MR 5.1 and MR 5.2)

This product is manufactured in the following SWF facility: Reynosa, Tamp., Mexico. Determine the distance in statute miles to your project site from the Springs Window Fashions manufacturing location. You can use the following Website to determine the distance to your job-site (not a SWF Website): [www.geobytes.com](http://www.geobytes.com)

### SECTION 4: Innovation and Design Information

(\*LEED – New Construction v2.2 Innovation in Design Credit ID 1)

This product can be ordered with motorized controls to open and close the slats, and can be connected to a building lighting and environmental control system. As a result, the blinds can be used to maximize solar heating, optimize daylighting, and minimize heat loss to the outside through windows, working in concert with the building control system.

Springs Window Fashions uses Basswood lumber supplied from saw mills in the Great Lakes and Appalachian regions. Basswood is recyclable, biodegradable, and renewable. Local wood requires less transportation versus wood originating in Asia.

All LEED rating point references are suggested applications of SWF products to the LEED rating system. LEED applicants should use their own objective determinations of product attributes for LEED certification purposes.
