

Graber® TradeWinds® Natural Shades Green Info Sheet

Green Properties of Graber Natural Shades

• Natural Shades with liners block up to 100% of UV rays when the shade is completely lowered. This lengthens the life of furniture, carpet and furnishings, saving landfill space.

• The fabrics used in the woven wood fabrics are stained using a boiling process. Stained materials are then air-dried, saving energy.

Eco-Friendly Raw Materials

• The fabrics offered in our Natural Shades program are natural; many are classified as a renewable resource, such as bamboo, rattan reed, grass and jute.

• All of the components of this product are 100% recyclable, including the natural fibers and wood headrail made from sustainable wood. Plastic components in Natural Shades contain up to 10% pre-consumer recycled material.

• Corrugated cardboard is used to package all products and is 100% recyclable. The cardboard itself contains 35 to 40% recycled content. The angle board used to reinforce the cardboard is 100% recyclable, and contains 80% post-consumer recycled material and 20% pre-consumer recycled material. Poly tubes, EPS pads, parts tub and bubble wrap used in packaging are also 100% recyclable.

• Custom box cutting machines are used to cut each box to the exact size of the blind. This process eliminates wasted cardboard, packing materials and shipping energy.

Green by Nature is Springs Window Fashion's commitment to the environment.

Graber is a brand of SPRINGS WINDOW FASHIONS the Best Experience Company
