

Size Considerations

This table provides the maximum shade size available by fabric, control type, and valance style.

If your shade size is larger than the maximum width, your fabric may be able to be turned width for height for larger shades. Use the fabric turned width for height table to determine this maximum size.

Minimum Shade Size

For all fabrics and lift options:

Minimum shade width and height: 13" (16" minimum width on 12 volt).

See mounting depth illustrations for mounting depth requirements.

Maximum Shade Size: Continuous-Loop Lift
