

Graber® Fresco® Roman Shades Green Info Sheet

Green Properties of Graber Roman Shades

- Roman Shades block the sun's heat, reducing solar heat gain in the summer. This insulating effect reduces energy consumption and lowers energy bills.

- By blocking out the sun's UV rays, Roman Shades also prevent damage to furniture, flooring and belongings, thereby protecting the durability of your home and reducing prematurely sending damaged products to a landfill.

- Roman Shades carry a limited lifetime warranty. These blinds are designed, engineered and tested to ensure a long life, reducing landfill waste from short-lived products.

Eco-Friendly Raw Materials

- Several of the Roman Shade fabrics are certified with the *Oeko-Tex Standard 100: "Confidence in Textiles"* label. This verifies that the fabrics are free of PVC, Halogen, Lead, Formaldehyde, allergenic dyes, pesticides, phenols, heavy metals, among others.

- All of the components of this product are 100% recyclable, including the fabric, aluminum headrail and plastic components. Plastic components in Roman Shades contain up to 50% pre-consumer recycled material.

- Corrugated cardboard is used to package all products and is 100% recyclable. The cardboard itself contains 35 to 40% recycled content. The angle board used to reinforce the cardboard is 100% recyclable, and contains 80% post-consumer recycled material and 20% pre-consumer recycled material. Poly tubes, EPS pads, parts tub and bubble wrap used in packaging are also 100% recyclable.

- Special tubes used to keep the fabric shape intact during shipping are 100% recyclable.

- Custom box cutting machines are used to cut each box to the exact size of the blind. This process eliminates wasted cardboard, packing materials and shipping energy.
