**TASK: Replace Clutch System and Continuous Loop on Cellular, Pleated or Roman Shades**

Use If/When: Clutch system and continuous loop control with color coordinated metal rail and white plastic cover needs to be replaced.

**Tools Needed:** Flathead Screwdriver

---

**To replace cord loop only, skip steps 7-9.**

1. **Raise shade fully. Remove screw to release tensioner or cord locking guide at the bottom of the continuous loop.**

   **Cord Tensioner prior to March 5, 2012:**

TASK: Replace Clutch System and Continuous Loop on Cellular, Pleated or Roman Shades

Use If/When: Clutch system and continuous loop control with color coordinated metal rail and white plastic cover needs to be replaced.

Tools Needed: Flathead Screwdriver

8. Loosen screw inside rail. Remove clutch by pulling from headrail.

9. Insert new clutch by pushing black drive shaft into rod. Tighten screw inside rail to hold clutch in place.

10. Reinstall the continuous loop by gently turning and wrapping the loop under the teeth of the clutch.

11. Reinsert the cord divider into the clutch. Make sure the continuous loop lays in the grooves of the divider. Slide divider up into the clutch.

Cord Divider
TASK: Replace Clutch System and Continuous Loop on Cellular, Pleated or Roman Shades

Use If/When: Clutch system and continuous loop control with color coordinated metal rail and white plastic cover needs to be replaced.

Tools Needed: Flathead Screwdriver

12. Snap clutch cover in place. Replace dust cover.

13. Reinstall shade back into brackets by attaching front of shade to the front of the brackets and pushing back on shade until it snaps into place.

14. Mount the tensioner or cord locking guide depending on manufacturing date as previously installed.
