

TASK: Vertical Cellular – Cord Too short or Right End Plate Will Not Reach Right Side.

Use If/When: Cord too short or end plate will not reach the right side during installation.

Tools Needed: N/A

1. Tension cords may be too tight. Press buttons on handles to release tension.

2. Metal plate on tension cord may be out of place. Make sure the metal plate is next to the lock collar as shown below.

3. Check to make sure the cord guides are not touching the tension bar and lock collar.
